

Adult Money Workshops

A different perspective on affordability

Supporting people to get to grips with their money can be key to them being responsible consumers as well as helping them achieve their goals and improve their wellbeing. Our **full day face-to-face workshop** aims to help people develop the knowledge, skills, attitude and behaviours to manage their own money well, as well as get alongside others and have an informed conversation with them about their money. We believe a personal perspective on finance can lead to more effective execution of affordability measures, improving outcomes for both consumers and the company. With prices starting from £1500, why not see what our workshops can do for your organisation.

Our full day workshop covers:

- *Planning your finances*
 - *Facing debt*
- *Saving to achieve your goals*
- *Choosing financial products*
- *Managing everyday money*

"A worthwhile exercise"
Head of Credit Operations

"Easy to follow,
informative...would help the
advisors with their role"
Regulatory Change Manager

Whether you're working in financial services, or supporting customers, our workshop can be the start of a better relationship with money for you and your customers.

For more information about our workshops for adults – please contact Jasbinder Kaur, Training Officer, 0207 062 8933
